DETAILED ACTION

Claims 4-7 are pending in the application.

This action is in response to applicants' amendment filed October 10, 2008.

Claim 5 has been amended.

Note: The applicants' are reminded of the manner of making amendments.

37 CFR § 1.121 Manner of making amendments in application.

(c) Claims. Amendment to a claim must be made by rewriting the entire claim with all changes (e.g., additions and deletions) as indicated in this subsection, except when the claim is being canceled. Each amendment document that includes a change to an existing claim, cancellation of an exiting claim or addition of a new claim, must include a complete listing of all claims ever presented, including the text of all pending and withdrawn claims, in the application. The claim listing, including the text of the claims in the amendment document will serve to replace all prior versions of the claims in the application. In the claim listing, the **status of every claim must be indicated after its claim number by using one of the following identifiers in a parenthetical expression: (Original), (Currently amended), (Canceled), (Withdrawn), (Previously presented), (New), and (Not entered).**

The following claim(s) fail to properly identify the status of the claims:

claim 5 has been amended in the response filed October 10, 2008, but claim 5 indicates (Previously presented) after the claim number. Amended claims will not print properly if the status identifier is not properly stated, i.e. (Currently amended).

Response to Amendment

Applicant's amendments filed October 10, 2008 have been fully considered with the following effect:

1. The applicants' are reminded that the amendments filed February 20, 2008 and April 18, 2008 have not been entered and thus the amendments to the specification with respect to the priority insert into the first line of the specification has not been entered.

2. The applicants' are reminded that the amendments filed February 20, 2008 and April 18, 2008 have not been entered and thus the amendments to the specification with respect to the title of the invention has not been entered.

3. The applicants' amendments are sufficient to overcome the 35 U.S.C. § 112, second paragraph rejections labeled 4c) of the last office action, which is hereby **withdrawn**. However, with regards to the 35 U.S.C. § 112, second paragraph rejection labeled a) and b) in the last office action, the applicant's amendments and remarks have been fully considered but they are not persuasive.

a) The applicants' failed to comment on the rejection of Claim 5 where periods are used throughout the claim. A period is used to end the claim or in some instances in the nomenclature of species thus the use of periods after the letters a, b, c and d are improper.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, for reasons of record and stated above.

b) The applicants' failed to comment on the rejection of Claim 5 where it was stated that it was not known what is meant by "[1,5a]" in the nomenclature of the

second species. It is believed that the applicants intended "[1,5-a]" as appears in the other three species.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, for reasons of record and stated above.

Allowable Subject Matter

4. Claims 4, 6 and 7 are allowed. None of the prior art of record or a search in the pertinent art area teaches the compounds, compositions and method of use of the compounds of formula III as claimed herein.
